Re: L. E. Carpenter Company (aka Dayco Corporation) Site in  
Wharton, NJ

Dear Dr. Kampbell:

I recently received a draft work plan dated September 16, 1991 for a bioremediation treatability study for the L. E. Carpenter Company Site. Since you may be interested in how the proposed treatability study relates to the work that will be done under your research project, I have enclosed a copy of this plan for your information. The New Jersey Department of Environmental Protection and Energy has set a due date of October 9, 1991 for submittal of EPA comments on this draft report. If I can review the report before then, I would like to discuss the report with you so that I can incorporate your views in the EPA comments. If you are not able to finish the report by then, I may be able to get an extension of the due date.

Please contact me at (FTS) 264-8098 after you have had a chance to review the enclosed document.

Sincerely yours,

Jonathan Josepfs, Project Manager  
New Jersey Superfund Branch II  
Emergency and Remedial Response Division
